PROFESSIONAL SUMMARY

Backend Software Engineer with 3 years of experience building scalable, low-latency systems in **fintech** and **real-time gaming**. Domain expertise in **trading platforms, order management and broker integrations**, with strong **Golang**, **Kafka** and **Redis**. At INDmoney, owns order queueing, omnibus migrations (~$50M moved) and the Scala-to-Golang migration.

PROFESSIONAL EXPERIENCE

INDmoney, Bengaluru — Software Engineer 1 Sep 2025 – Present

- Led the **Alpaca Fully Disclosed to Omnibus migration** end-to-end from the trading side, moving ~**$10M of cash into the pool account** and enabling interest income on idle balances.
- Drove the **DriveWealth (DW) Omnibus migration** across the trading stack, bringing ~**$40M of cash** into the omnibus pool and improving capital efficiency across broker integrations.
- Architected the **Order Queueing system** that runs RMS checks before broker submission, absorbs market-open traffic spikes, prevents database overload and enables **zero-downtime EOD/BOD operations**; brought the risk of **negative user balances down to zero**.
- Spearheaded the migration of critical trading services (**Trade Screen, Order Placement, Event Consumption**) from **Scala to Golang**, improving scalability, concurrency handling, resource efficiency and maintainability.
- Owned the **Order Modification flow** end-to-end, supporting modifications for ~**5% of daily orders** at **99.8% accuracy** and reducing cancel-and-replace operations.
- Implemented **SIP via Wallet**, removing the dependency on mandate creation and driving ~**10% of daily trading volume** through the new flow.
- Engineered a **Variable Pricing platform** for dynamic brokerage by stock, user type and order type (Normal/Rewards), creating an experimentation layer for retention and engagement.
- Integrated **GTN as a new broker**, expanding access to **European markets and UCITS products**.
- Shipped Fractional Limit Orders, Trigger Orders, Extended-Hours Trading, Cancel Partially Filled Orders, Market Depth and a revamped Order Status experience, improving execution flexibility and the overall trading experience.

Junglee Games, Bengaluru — Software Engineer Aug 2024 – Aug 2025

- Introduced **preferential matchmaking** with priority-based optimal table counts, cutting average **join time by 25%** and lifting **system revenue by 10%**.
- Developed **geolocation and skill-based matchmaking** using Golang, Redis (geospatial), Kafka, PostgreSQL and MongoDB; **100% compliance** on separating nearby users and **80% accurate** skill-level matching.
- Delivered the **BuyInLimits Service** to validate deposit limits in real time, ensuring **100% regulatory compliance** for responsible gaming.
- Improved observability with structured logging, system metrics and **New Relic APM**.

Junglee Games, Bengaluru — Software Engineer Intern Aug 2023 – Aug 2024

- Designed and deployed a real-time **Odds Calculator Service** using the **2+2 algorithm** and **Cactus Kev's algorithm**.
- Optimized the **HandHistory service** (events stored in **AWS S3**) with **Goroutines** for **10x faster execution**; integrated **OpenTelemetry** for monitoring.
- Raised **test coverage by 80%** with unit and integration tests; refactored legacy code for maintainability.

SKILLS

Languages: Golang, Scala, C++, SQL
Backend & Architecture: Distributed Systems, Microservices, REST APIs, Event-Driven Architecture, Concurrency, System Design
Databases & Messaging: PostgreSQL, MongoDB, Redis, Kafka
Domain: Order Management, Broker Integrations, Risk Management (RMS), Trading Platforms, Compliance
Cloud, Observability & Tools: AWS (S3), OpenTelemetry, New Relic APM, Git, GitHub Copilot, Cursor

PROJECTS

- **Route Optimization (2023):** Implemented a **CVRP search-based algorithm** for biomedical waste management, optimizing real-world hospital collection routes.
- **Snippy (2023):** Created a full-stack code snippet manager for CS students using **React, MongoDB and REST APIs**, improving developer productivity.

EDUCATION

SRM Institute of Science and Technology, Chennai — B.Tech, Computer Science (CGPA: 9.8) 2020 – 2024

NOTABLE ACHIEVEMENTS

- Recognized as **Star Performer of the Quarter** at Junglee Games (Oct 2024) for outstanding contributions to the engineering team.
- Awarded the **Shiv Nadar Foundation Scholarship** for both **schooling and undergraduate studies**, recognizing sustained academic merit across school and college.
